

The diagram illustrates a container architecture stack. At the top, two application boxes are shown: 'App A' (white with a green border) and 'App B' (yellow with an orange border). Below 'App A' is a 'Bins/Libs' box (white with a green border). Below 'App B' is a 'Bins/Libs' box (yellow with an orange border). These four boxes are grouped within a light blue 'Docker Engine' box. The 'Docker Engine' box sits on top of a white 'Host OS' box, which in turn sits on top of a white 'Server' box. All boxes have thin blue borders.
